The following is a statement of April 10th:

The report from Frankfurt describes incessant fluctuations on the Bourse during the past week or two. A few days ago there was a complete pause. Orders for sale came in from all sides. Next morning everything went in an opposite direction, and peaceful rumors from Berlin said that a general strike had been called. This was immediately followed by an improvement. The final result is best illustrated by the fluctuation of the five per cent National. Before the war rumors the quotation stood at 61 on Friday. Sunday it was down to 58, and Monday to 54 1/2, and on Saturday to 53 1/2. Vicksburg was down from 115 to 103 and is now 111.

Notwithstanding all this alarm, very few people, it is said, believe in ultimate war, provided the emperor would be ready to make peace. The first major battle, which took place at Albuera, might prove again at any moment as long as nothing definite is known about the intentions of France.

The amount of business transacted during the week was enormous. American bonds continue 4 per cent. The New-York quotation for the 100 shares of the German Government is 100. The circulation of the great mass of bonds held by parties who have engaged for options.

Money remained moderately easy, discount in the open market being 1%. It is a remarkable fact that the Franklin leather fair, which is just over, has been held. Several large firms at Philadelphia, and this feeling was strengthened by the statement of the Congressmen concerning French neutrality.

The idea of a German-American war seems to have given birth to a Napoleon fever. It is observed, however, that it is too incompatible with common sense to be readily credited. The apprehension that there might be an understanding with the French Emperor was the only real cause of the alarm, which is said to have been removed by the publication of the following report from Frankfort:

The following is a statement of April 10th:

The Providence Journal says of Printing Cloth:

Market very dull. Printers, generally, as well as speculators, decline to buy at anything like present quotations, anticipating a decided further decline. Stocks of cloth on hand accumulate, and will be rapidly increased after the present market shows increasing ease, and the supply of currency is in excess of the wants of the borrower. First-class paper is scarce and in demand at 7 1/2 per cent., and call loans are readily effected at 6 1/2 per cent. and occasional ones at 6 1/2 per cent. The position of the American Bank continues to improve. The circulation is reduced to 22,987,927, while the billion amounts to 12,666,326.
